SUMMARY

Full Stack Software Engineer with 5+ years of experience building web and mobile applications across frontend and backend. I mainly work with TypeScript, React, Next.js, Node.js, and NestJS, with experience using both relational and NoSQL databases. Over the past two years, I've worked on projects for Japanese clients across five industries, including hospitality and travel. I'm used to working remotely with international teams, collaborating with other engineers, project managers, designers, and QA engineers in English. I'm currently pursuing a B.Sc. in Computer Science at BINUS University.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, PHP
- **Frontend & Mobile:** React, Next.js, React Native, Ionic, Vue.js, Redux, Zustand, Tailwind
- **Backend:** Node.js, NestJS, Express.js, Laravel, GraphQL
- **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, Redis, Prisma, TypeORM
- **Cloud & DevOps:** AWS, Azure, Vercel, Docker, Sentry, Git

WORK EXPERIENCE

Full Stack Developer - Remote

Singapore

Jitera

October 2024 - Present

Working in Jitera's Solution division, building web and mobile products for Japanese clients.

- Delivered 5 projects for Japanese clients across hospitality, HR, travel, wellness, and digital media, using Next.js, React, NestJS, and React Native
- Developed an internal workforce management system with a companion attendance app for an HR client, covering candidate tracking, placements, and worker attendance
- Built a customer reservation and loyalty platform for a hospitality client, with multi-location booking, promotions, and a points-based rewards system
- Work in English with clients and international PMs, QA engineers, and UI/UX designers from requirements through delivery
- Use AI coding agents (Claude Code) daily, and reviewing all generated code before merging

Software Engineer - Remote

Abu Dhabi, United Arab Emirates

Charcentric

January 2022 – October 2024

Spent most of this role on APCO Worldwide's Dubai team, and also worked full stack on Charcentric's own projects.

- Delivered 4 internal products for APCO as a frontend engineer, using React, Next.js, and TypeScript
- Built the frontend for a low-code AI workflow builder, where users visually design data pipelines and LangChain-powered AI workflows to process and analyze media and communications data
- Built the frontend for an AI document generation platform, where users create documents from reusable templates, writing styles, and data sources, refine each section with AI proofreading, fact-checking, translation, and chat, then export to PDF or Word
- Worked directly with APCO stakeholders on requirements, and provided technical support after release

Full Stack Developer**Jakarta, Indonesia****PT Immobi Solusi Prima**

December 2020 – December 2021

Placed at Telkomsel, Indonesia's largest mobile network operator, building internal applications for its teams.

- Developed internal web applications for Telkomsel teams using React, Ext.js, and Laravel, integrated with existing internal systems
- Built backend services with Node.js, Express.js, and Sequelize on MySQL
- Monitored, debugged, and fixed production issues to keep the applications stable

EDUCATION

Computer Science, Bachelor's degree**Jakarta, Indonesia**

BINUS (Bina Nusantara) University (Online Program)

May 2023 – Expected Jun 2027

Immersive Full Stack JavaScript**Jakarta, Indonesia**

Hacktiv8

July 2020 – October 2020

Honors Graduate with Final Score: 94.79/100

Computer & Network Engineering**Bogor, Indonesia**

SMK Negeri 3 Bogor

July 2017 – July 2020

Final Score: 84/100

LANGUAGES

Indonesian (Native), English (Professional working proficiency)
